WEB DEVELOPMENT PROJECT REPORT

Three Basic Websites Using HTML and CSS

Student Name	K. Ramya Sai Nandini
Roll Number	26001082
Branch	B.Tech
Course	CSE & AIML
Academic Year	2026

1. Introduction

The objective of this project is to develop three simple static webpages using basic HTML and CSS. HTML organizes the content, while CSS adds colors, spacing and basic page design.

2. Software and Technologies

Software: Notepad or Visual Studio Code and a web browser.
Languages: HTML and CSS only. JavaScript and databases are not used.

3. Programs Developed

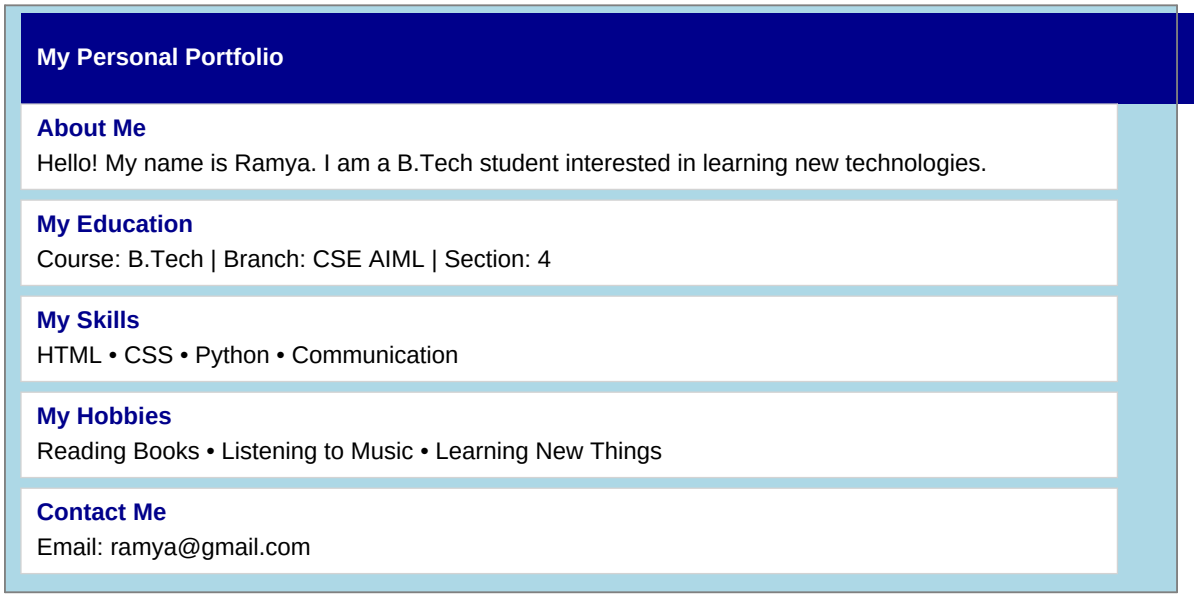
Program 1 – Personal Portfolio: Shows an introduction, education details, skills, hobbies and contact information. It uses a light-blue background and white content boxes.

Program 2 – College Information: Shows a sample college introduction, courses, facilities, admission details and contact information. It uses a light-yellow background and dark-blue heading.

Program 3 – Online Learning: Shows an online learning platform introduction, three courses, learning benefits, goal and contact information. It uses a lavender background and purple heading.

4. Expected Outputs

Output 1 – Personal Portfolio Website



Output 2 – College Information Website

ABC Engineering College

About Our College

ABC Engineering College provides quality education to students.

Our Courses

Computer Science • AI and ML • ECE • Mechanical • Civil

Facilities

Library • Computer Labs • Sports Ground • Hostel • Transportation

Admission Details

Admissions are open for academic year 2026–2027.

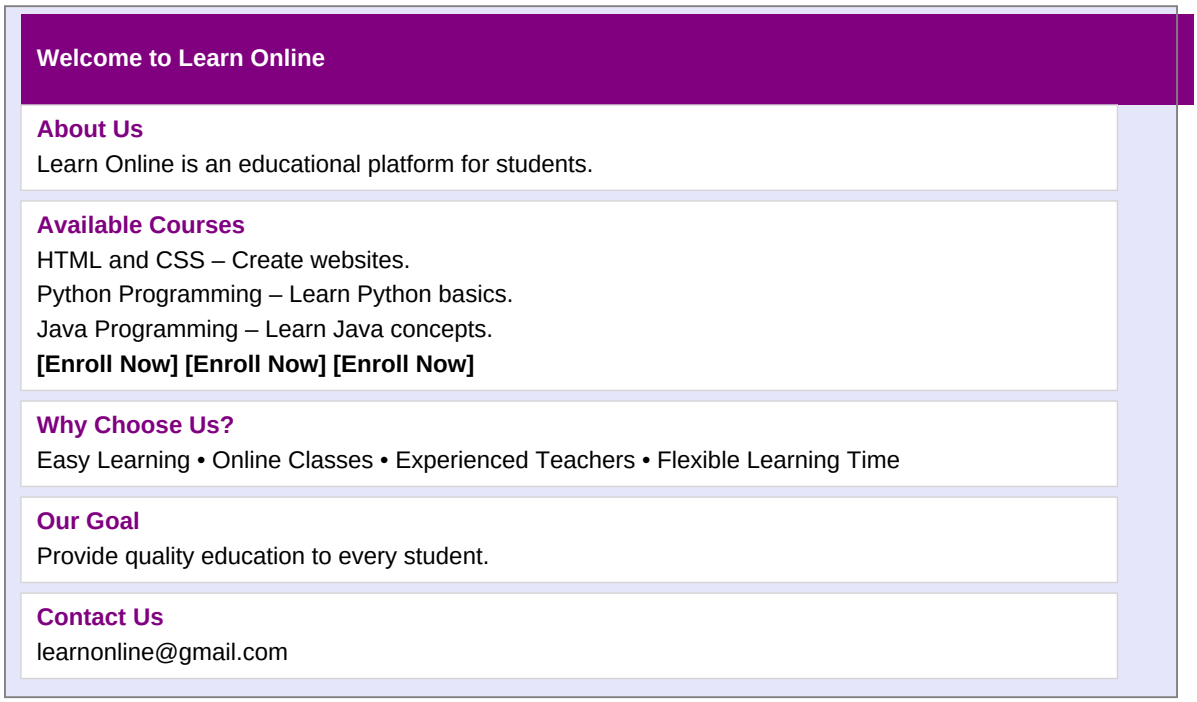
OUTPUT PREVIEWS AND CONCLUSION

Output 3 – Online Learning Platform



5. Result

Three basic webpages were created using HTML and CSS. The pages display information in separate sections with simple styling.

6. Conclusion

This project demonstrates the basic structure of HTML and the use of CSS to improve webpage appearance. All three webpages can be opened locally in a web browser.

7. Limitations

The webpages are static. The Enroll Now buttons are display-only and do not submit enrollment details. Sample email addresses and college information should be updated with verified details before real use.
